

Forget one dimensional, flat, boring picture postcards. They are looked at once, and forgotten. Now you can buy yourself, your friends and family not a postcard, but the whole city - in only 1 interactive Multimedia Postcard!

The interactive Multimedia Postcard is a postcard with an integrated CD or DVD. It can easily be mailed anywhere in the world, with a regular postage stamp, just like traditional postcards. But that is not what it is all about: the interactive Multimedia Postcard is also the best souvenir, for you or your friend - the gift that won't be forgotten. It will be viewed again and again, because it provides a unique, exciting, entertainment experience of your trip.
